### **EXHIBIT C FOR CRAFT AUGMENTATION**

#### **TENNESSEE VALLEY AUTHORITY HOURLY RATES OF PAY AND FRINGE BENEFITS FOR CRAFT AUGMENTATION OF WORK PERFORMED UNDER CONTRACT**

This Exhibit C lists the classifications and rates of pay for craft contractor employees augmented (craft augmentation) to the TVA annual work force. **INSTRUCTIONS**: The Wage Schedule C should only be added to contracts (which contain either the CPA, CPA-S, or PMMA) where TVA has contracted with the contractor to provide for craft augmentation services.

(This document is to be used only when augmenting trades and labor employees to TVA. The employment of these contractor employees is covered by the Construction Project Agreement, the Construction Project Agreement Supplement, or the Project Maintenance and Modifications Agreement.)

## **ENDNOTES**

1. a. Health and Welfare and Pension Contribution - Health and Welfare and Pension contributions may vary for some crafts by local union from those rates listed in this exhibit. (See Article XII:1 and 2 of the Project Maintenance and Modifications Agreement and Article X:A and B of the Construction Project Agreement.) Prior to making wage or benefit payments, the contractor and the union involved should communicate to ensure that payment amounts, payment rules, and the name and address of the fund where the payments should be made are correct. (For the instructions in behalf of employees in Iron Workers classifications, the contractor should contact the Iron Worker Council Representative.)  
  
b. The rate of contributions to fringe benefit funds are paid at the straight-time rate even during overtime hours worked. During overtime, only the hourly wage rate is multiplied by the overtime multiplier. In other words, the established rate of contributions to fringe benefit funds is paid for hours worked and not hours paid.
2. In 1983, TVA and the Tennessee Valley Trades and Labor Council agreed to a new series of classifications (Asbestos Worker Subjourneyman, Boilermaker Helper [revised to Boilermaker Subjourneyman 12-97], Bricklayer Improver, Groundman--Maintenance [IBEW], Reinforcing Iron Worker Subjourneyman, Structural Iron Worker Subjourneyman, Machinist Helper-Maintenance, Painter Utilityman, Cement Mason Improver, Roofer Subjourneyman, Roofer--Slate and Tile Subjourneyman, Sheet Metal Worker Pre-Apprentice, and Production Worker Steamfitter Subjourneyman). These classifications are considered as nonjourneymen, and they are not in a training position or a progressive position leading to journeyman status. The total number of apprentices and nonjourneymen in a particular craft is not to exceed 33-1/3 percent of the craft work force. Some of the conditions of the agreement are: They are under the supervision of a general supervisor and the direct supervision of a foreman; they work with journeymen and perform tasks as assigned which do not require journeyman skills; they may be assigned to any work which, in the judgment of management, he/she can perform safely and efficiently; they must be physically able to do the work; and they must have a general knowledge of safe and proper use of handtools.
3. Must be certified under ASME Section 9.
4. For Crane Operator, the following premiums are paid: A premium of 75 cents per hour above the straight-time rate is paid for all hours when hired to operate the following: (1) cranes with 100 feet of boom, including jib; (2) tower cranes; or (3) ringer cranes.
5. Restricted to Nuclear Power.
6. Truck Driver I - Includes: (1) dump trucks 3 cu. yds. and under, struck measure; (2) trucks other than dump trucks with a manufacturer's nominal rating of 3T and under. Does not include trucks covered by the classification Truck Driver III.
7. Truck Driver II - Includes: (1) dump trucks over 3 cu. yds., struck measure, up to and including 6 cu. yds., struck measure; (2) trucks other than dump trucks having a manufacturer's nominal rating of over 3T up to and including 5T. Does not include trucks covered by the classification Truck Driver III.
8. Truck Driver III - Includes: (1) dump trucks over 6 cu. yds., struck measure; (2) trucks other than dump trucks over 5T; (3) trucks regardless of size having special equipment, such as fuel delivery equipment, dumpsters, mixers, winches (except bumper winches on trucks regardless of size, when used only to help the truck over rough or muddy ground), cargo refrigerating or heating units, etc.; (4) crawler trucks regardless of size; (5) tractor-type trucks of any size; (6) trucks of any size when pulling heavy capacity trailers such as lowboys, vans, mobile health clinic trailers, floats, etc.; (7) right-of-way clearing spray trucks. Does not include trucks covered by the classification Driver--Special Line Equipment. Does not include winch trucks with permanently attached "A" frame or boom when assigned primarily for hoisting for one week or more; under these circumstances, the driver position is classified as Crane Operator.

A premium of 30 cents per hour above the Truck Driver III rate is paid while driving a dual-powered, dual-control 400-ton lowboy. This premium is paid to those drivers actually performing the work described above.

## ENDNOTES (continued)

9. This rate is the total wage package which is the total that may be paid when the hourly wage and all fringe contributions, if any, are added together. For a definition of all payment items that can make up the total wage package, see the Project Maintenance and Modifications Agreement, Article XII:1 and Construction Project Agreement, Article X:A.
10. Receives fringe benefit contributions of the craft from which employed.
11. The Boilermaker Subjourneyman classification Health and Welfare and Pension contributions vary depending on when the individual was first hired by any contractor as a subjourneyman. (For a description of subjourneyman, see Endnote 2).

	<u>First Employed</u>	
	<u>Prior to</u>	<u>After</u>
	<u>11-1-97</u>	<u>11-1-97</u>
Boilermaker Subjourneyman	\$16.07	\$16.07
Health and Welfare Fund	3.70	3.00
Pension	3.00	.25
Annuity	.50	.10

## OTHER PAYMENTS

### **United Way**

Employee voluntary contributions to the United Way are to be matched up to 5 cents per hour for each hour worked. (See **LRS-5** and **LRS-7**)

### **Construction or Maintenance and Modification of Transmission Facilities Only**

Skilled or semiskilled employees engaged in construction or maintenance and modification of transmission facilities, whose temporary work location is changed throughout the work area, are paid a subsistence allowance of \$35.00 for each night lodging is obtained and occupied when the temporary work location board town is more than 55 map (Rand McNally's Standard Highway Mileage Guide) miles from the city or town of the employee's permanent residence. Employees will be eligible for payment of the subsistence allowance if pay is received for productive work on the day following the night lodging is obtained and occupied, except employees will not be eligible until the temporary work location is changed from the original employment work location and they have reported to the new temporary work location for which the designated board town is more than 55 map miles from the city or town of their permanent residence. At any time the contractor specifies that overnight lodging is required, the employee will be paid the subsistence allowance for each night lodging is obtained and occupied while working on that assignment regardless of distance to permanent residence. In a move between work location board towns, while engaged in construction or maintenance and modification of transmission facilities, the employee will be paid 23.5 cents per mile for providing his own transportation.

## APPRENTICE WAGE RATE SCHEDULE

(Note: See LRS-16)

This structure is intended to help facilitate the identification of the proper wage rates for apprentices. The following ranges accommodate any local apprentice program provided the program has a minimum of four periods and a maximum of ten periods. Apprentice wage rates are determined by selecting the schedule of periods listed below that corresponds to the number of periods in the applicable craft apprenticeship program, locate the period which reflects the current period of the apprentice to be paid, and then applying the percentage listed for that period to the basic journeyman wage rate for the craft as listed in the preceding schedule of wage rates.
